

# **FINAL Draft Local Enterprise Partnership Transport Strategy**

Cheshire and Warrington Local Enterprise Partnership is consulting on its draft Transport Strategy setting out how transport provision within Cheshire and Warrington should develop over the next 20 years. The proposal underpins the LEPs' objective of making the area a £50 billion a year economy by 2040.

The plan focuses on strategic transport priorities. Local issues will be covered in the local transport plans that the three authorities are responsible for.

Join us at one of our events, being held across Cheshire and Warrington, to give you the opportunity to share your comments.
